2012 SHORT

COURSE Guide

January to June 2012

apics short courses can help you build a skill-laden workforce with a competitive advantage. Participate in interactive discussions, examine case studies, and develop strategic problem-solving skills to expand your industry knowledge and advance your career.

Our goal is to continue to set the standard as the recognised leader and premier provider of supply chain, operations and resource management education for both individuals and organisations. Our professional development programs are suitable for a wide range of needs and levels of experience.

Accurate and Balanced Inventory

A practical one day workshop for anyone involved in stock record accuracy who would like to eliminate the need for repetitive physical stocktakes. Various techniques will be covered including the Four Step approach to achieving accuracy through Cycle Counting.

24 January 2012
9am - 5pm
Members \$715
Non Members \$935

MPS / RCCP Master Class

Two of the most important management processes contained within Operational S&OP are Master Scheduling (for manufacturing and non-manufacturing companies) and Rough Cut Capacity Planning. This one day Master Class will cover critical aspects of these processes and how they integrate with Executive S&OP and an Enterprise Resource Planning System.

23 February 2012
9am - 5pm
Members \$715
Non Members \$935

Overall Equipment Effectiveness

OEE reduces complex production problems into simple, intuitive presentation of information.

This one day workshop will help you systematically improve your process with easy-to-obtain measurements.

16 February 2012
9am - 5pm
Members \$660
Non Members \$880

Sales and Operations Planning

Guide your company to lower inventories and shorter lead times with higher shipping reliability through a better S&OP process. Learn how to use cross-functional Sales and Operations Planning (S&OP) to improve: Customer Service, Inventory & Profit Levels, Overall Communication, New Product Development and Product and Business Rationalisation.

27 March 2012
9am - 5pm
Members \$775
Non Members \$995

Lean Enterprise

When organisations decide to go lean, they need a skilled team to lead them. Build your skills and become a lean leader. This four day non certification course covers seven new lean enterprise workshops: Introduction, Creating Lean Culture, Value Stream Mapping, Stability and Process Improvements, Just-in-Time, Measuring and Sustaining.

This workshop will allow you to

- Complete a self-assessment to determine your organization's readiness to implement lean
- Gain practical experience analysing how to incorporate lean into organizations
- Leave with a project plan for implementing lean into your organization

20 & 21 March 2012
28 & 29 March 2012
9am - 5pm
Members \$1540
Non Members \$1760

2012 Short Course Guide

Develop Your Professional Skills

January to June 2012

Warehouse Management

A conversational, one day, non academic program using worked examples and case studies to better understand Warehouse Management concepts. Learn to view your operation from a customer's perspective. Understand what the critical cost components of a warehousing operation are and how to quantify them. Address the unique management challenges existing in a warehousing operation and evaluate the advanced technologies available. Understand the pro's and con's of sub-contracting the warehousing function.

30 March 2012

9am - 5pm

Members \$715

Non Members \$935

Forecasting and Demand Management

This course will provide you with a step by step approach to achieving improvements in your forecasting process, the mistakes to avoid and sure fire approaches that will reduce your forecasting effort. Accountabilities and cross functional links will be discussed to enable you to assess the quality of your current processes against world class checklists.

16 April 2012

9am - 5pm

Members \$715

Non Members \$935

Supply Chain Metrics

Drive success with supply chain performance measurement. Surveys consistently show a high level of dissatisfaction with performance measures, particularly non-financial measures. This two day workshop will review concepts and practices in Supply Chain performance measurement leaving you with a deeper understanding of the measures used to manage Supply Chains.

19 & 20 April 2012

9am - 5pm

Members \$880

Non Members \$1100

S&OP Performance Measures Master Class

What gets measured gets improved! This one day Master Class will outline the top ten performance measures that should be part of your Executive Sales & Operations Planning process. You will learn the best practice approaches for choosing, integrating, managing and measuring your supplier base.

27 April 2012

9am - 5pm

Members \$715

Non Members \$935

Business Statistics

Designed to remove the fear in people's minds about Statistics and show it as a powerful tool to have in your toolkit to solve problems and make decisions scientifically.

You will learn to:

- help your organisation reduce waste
- establish and interpret Control Charts to run products/services to specifications
- understand the meaning of Six Sigma and how to use it in daily life
- making Visual Control & Problem-solve presentations for Teams
- and generally use science in running processes.

These processes could be in manufacturing, service or transactional environments .

1 & 2 May 2012

9am - 5pm

Members \$715

Non Members \$935

Item Master Data Master Class

Without an accurate data foundation your ERP system is incapable of supplying accurate planning and financial information so two sets of numbers develop along with the spreadsheet systems outside the ERP system and S&OP process. This class is about what is critical data versus non-critical data, how to measure it, and how to improve it.

21 June 2012

9am - 5pm

Members \$715

Non Members \$935
